## TECHNOLOGY

- **Proficient:** React, JavaScript, HTML, CSS
- **Knowledgeable:** React-native, Express, Bootstrap, jQuery, React-Redux
- **Some experience:** Node.js, Socket.io, MongoDB, PostgreSQL

## WORK EXPERIENCE

### Dearest.io

January 2019 – September 2019

*Frontend Developer*

*New York, NY*

- Coordinate with the lead developer to develop new features for public and admin site
- Modularize codebase to increase performance and readability
- Increase performance by replacing jQuery codes with Javascript
- Retrieve and render client information from the database using GraphQL
- Debug errors ranging from UI bugs to performance bugs
- Build and update website using React
- Design and implement a new booking flow for better user experience
- Design the default email template and alert the admins when educators decline a session
- Designed and implement a better way for admin to view the cost and profit for each session

### Extended Managed Long Term Care

October 2016 – December 2016

*Enrollment Coordinator*

*Staten Island, NY*

- Served as the first point of contact and completed pre-enrollment screening forms for potential enrollees
- Minimized data duplication through spreadsheets; saved administrative time and increased consistency
- Backfill lost appointment due to assessment cancellations and last-minute rush

## PROJECTS

- **Capstone - Sushi Go** | Developer | February 2018 | <https://github.com/1710-Capstone-SushiGo/SushiGo>  
*Sushi Go is a card game where each player picks a card and passes the rest of their hand to the next person. The player with the most points at the end of the game wins.*
  - o A mobile app that emulates the game that can be played with up to 4 players
  - o Created using React Native and Socket.io
  - o Responsible for game logic and front end design
- **Avalon Setup** | Sole Developer | January 2018 | <https://github.com/williamlee21/AvalonSetup>  
*Avalon is a game of deception where each player is to figure out the identity of the other players*
  - o A mobile app that narrates and adjusts the character script depending on who is playing
  - o Created using React Native
  - o Challenges: learning react native syntax and figuring out the text to speech

## EDUCATION

### Fullstack Academy of Code

October 2017 – February 2018
